

# LDMS Nest Box Monitoring: May 18, 2015

LDMS Box #1: Eastern Bluebird chicks at exactly one week old since hatching.

LDMS Box #2: Carpenter Bees observed again today buzzing vigorously (at least 3 bees observed)

LDMS Box #3: No nesting activity observed.

LDMS Box #4: Both male and female observed in and around the box incubating these eggs.

LDMS Box #5: House Wren's first egg in nest (Lay Date Today). The nest fills the box entirely making photographs very difficult. Wren heard singing nearby.

LDMS Box #6: The beginnings of a Tree Swallow nest. Students observed both the male and female near Box 6 during the monitoring observation today.

# LDMS Nest Box Monitoring: May 15, 2015

LDMS Box #1: Bluebirds continuing to grow. Female Bluebird observed exiting the box before monitoring.

LDMS Box #2: Carpenter Bees still present in the box during monitoring.

LDMS Box #3: No nesting activity observed.

LDMS Box #4: Male Tree Swallow dived at me repeatedly during monitoring today.

LDMS Box #5: House Wrens observed near box 5 calling with completed nest cup finally.

LDMS Box #6: No nesting activity observed.
